---

Hi,

I am a Senior Php Specialist who has developed and continues to develop myself on web technologies. I have been involved in / developed many projects for about 10 years. Some of them are;

Hocalarageldik.com, Lim10Tv, Teknofix Crm, Birikimevim Crm and servis.maintenancearena.com were projects.

Apart from these, I want to improve myself in the fields of node.js and vue.js and I am trying to get certificates in these fields.

---

## WORKS

---

### SENIOR SOFTWARE DEVELOPER/DIGILERA

07.2021/-

Digilera is a software company that develops the most suitable solutions for the needs of the Insurance, Fleet Leasing and Automotive sectors. A software company that designs efficient, reliable and user-friendly products that will facilitate the lives of all our stakeholders through business partnerships.

I develop and support the internal processes of the company and the project written in Symfony used by the customers.

I am also designing and developing a microservice architecture to use the new version of the company's enterprise CMS with Node.js.

Used Technologies;

Symfony, PHP, mySql, Node.js, Mongodb, HTML, CSS, JavaScript

### SENIOR SOFTWARE DEVELOPER/BIRIKIMEVIM

04.2021 / 07.2021

Birikimevim is a financial company that provides financial support to those who want to own a house and a car all over Turkey.

I was developing the company's CRM application coded with CodeIgniter. At the same time, I was responsible for bank and 3rd party integrations.

Used Technologies;

Laravel, CodeIgniter, PHP, PostgreSQL, Node.js, HTML, CSS, JavaScript

---

I am also a very hardworking, enthusiastic, social person who is prone to teamwork.

---

#### SKILLS

Elasticsearch, Redis, Memcached, Web Services, API, Soap, JIRA, RESTful, Project Management, Sqlite, Node.Js, PHP, Laravel, Phalcon, CodeIgniter, MySQL, HTML5, CSS, JavaScript

---

#### SENIOR SOFTWARE DEVELOPER/TEKNOFIX

04.2020 / 04.2021

Teknofix is a company that provides services that can manage the installation, delivery, document collection and technical support needs of corporate companies operating in the B2C model at the end-user address.

I was making improvements according to the needs of various units in the Salesforce infrastructure portal application used by the company.

In Inventory, Store, Backoffice modules; (Inventory Transfer, Approval, Return, Objection processes, Cargo Tracking System Integrations (MNG, Sürat) etc.)

Mobile Application Integrations (Services for mobile applications used by field teams) I especially developed the operation of the store sale and returns operations and the system integration with the inventory.

IT office365 - Salesforce Integrations

Used Technologies;

PHP, Rest, Soap, HTML, CSS, JavaScript, jQuery

#### SENIOR SOFTWARE DEVELOPER/LIMON PRODUCTION

10.2017 / 04.2020

Limon Production has been operating in the cinema-television world since 2003 by importing films and formats, as well as producing movies, television series and various types of programs for TV.

I was responsible for the setup and operation of the company's IT and Software infrastructure.

On Intranet CMS which is developed with C#, I made some development for some modules (company information, work in the market, casting agencies, information of the players etc.)

I developed a content management system where contracts are scanned and archived on Laravel.

For Optimus Consulting which is partner of the company, I made additional improvements for the hocalarageldik.com site. (Guidance system, Quiz system, Api Integrations, Question Solution System, Exam Simulation ...)

At the same time, I coded a mobile application named Milses (I developed a service with PHP and provided a database connection with Framework 7 Infrastructure and AngularJS with the Cordova framework)

Other Projects :

I worked for Backend and mobile integrations for a VOD platform called Lim10Tv, (Not Completed)

I developed a site for limonproduction.com.tr on Laravel

Technologies Used;

PHP, Phalcon, Memcached, HTML, CSS, JavaScript, MySQL

### **IT SUPPORT/ENTEGRES**

09.2014 / 09.2015

Entegres Information Technologies is a company that produces services and solutions in the field of information technologies.

I provided IT infrastructure services and supports to a team of 80 -100 people.

Server Setup, Configuration, Management (DHCP, DNS, Active Directory, FileServer, Exchange Server, Firewall)

Regular user support and services to solve common problems.

## **SOFTWARE DEVELOPER/FREELANCE**

06.2010 / 09.2014

After graduation, I was developing various freelance projects for companies.

I was preparing frontend design with Photoshop and developing with HTML CSS and JavaScript.

I was coding the the content management panel and backend with PHP.

Technologies I use PHP HTML Javascript JQuery
